

THE ART OF
AURAXIS

Prologue

A long time back, near 3000BCE, aliens came to our planet because they were betrayed by their vassal forces, they were on the brink of extinction and that's why they decided to hide their progeny and next of kin still unhatched. They hid them in a hurry because their enemy was still chasing them and it was nigh that they would be caught fast. The aliens left in a hurry after hiding and also putting a tracker on them so they could navigate back to their children in the future when they come back.

After countless centuries, Human Civilisation has advanced a lot and it is currently the 20th century. In the year, 1980; in the soviet union, near the mountains of, Humans found a perfect place to build a nuclear power plant named Novosibirsk after the city itself, it was the optimal spot and also the right amount of radiation as there were deposits of Uranium. They started the construction and it was surprisingly finished fast. There were many Scientists, and staff to run the Power plant properly. Scientists immediately started their research with all the equipment and technology available to them given by the Russian Federation.

The lead Scientist (Dr. Sergei Mukherjee) conducted regular experiments, after which, they dumped radioactive waste into the nearby lake.

Unknown to the people in the power plant, an entity was secretly absorbing the radioactive waste to speed up its development. This process took place over the span of 3-4 years, causing the entity to undergo massive changes and by the time this little entity fully matures; the humans had no idea the comeuppance they would be up against shortly.

Prologue

When this Entity started to go under massive changes it started to affect the nearby Uranium which is radioactive due to this the Scientists suddenly found a rise in radiation percentage around the facility, which in turn caused all types of machinery in the plant to go haywire.

This excessive radiation caused many deaths in the vicinity. Due to this, the Scientists started to look for the reason or the source behind this incident. So they recovered the source of radiation after 1 week and they found an Alien Egg and they started experimenting on it. Since the Aliens left a tracker with the Egg, they were notified about what was happening with their precious egg, and because of what the humans had done, the Aliens had become enraged and resentful.

The Aliens set off and headed towards planet Earth as soon as possible, thinking, the damage that would be done to the egg by the time they reached there. Unfortunately for the aliens, the damage was already done by the time they set foot on Earth. When the Scientists were experimenting this time around, an unknown change befell over the egg, and suddenly a mini gamma radiation blast occurred which killed all the people that were in the 200m range. At the same time, the alien egg which they were cautiously experimenting on was also vaporized.

The Aliens became more infuriated and maddened after they witnessed the vital sign of the egg drop down to zero. The Alien Queen, who had the regal aura around her was tearing up as that egg was her precious child. The Queen issued an attack right that instant via her subordinates. With just one laser beam from the spaceship, everything in the range of 2km including the power plant was annihilated. For all the obvious reasons nobody survived. Many people who were in the nearby cities got to witness such a deadly, terrifying, and yet beautiful scene. In the next few minutes, the aliens left planet Earth without making a fuss. Nobody knew what hit the power plant even now in the 21st century and in many years to come.

CHAPTER 01

CHARACTERS

AURORA

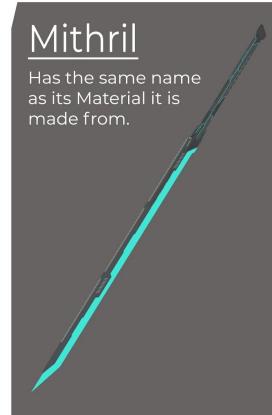

She and her fellow race members are originated from the '**Star pupil civilisation**'. Her race is unusual as they are special soul like life forms. Aurora is a distinctive being called '**'psychic'**', who is capable of using mental abilities to attack her enemies. Her territory is situated in shattered star system.

We took some time to configure her character design and this is our final output of our powerfull Queen.

As Aurora is an entity who is from a unique civilisation and is a soul like life form she doesn't need to wear clothes, but chooses to wear her scaly armour clothes for formality and traditions. Along with her attire she has a mask on her face, this mask restricts her powers which are too powerfull to control even for herself.

Mithril is the sword she carries along with her.

Mithril

Has the same name as its Material it is made from.

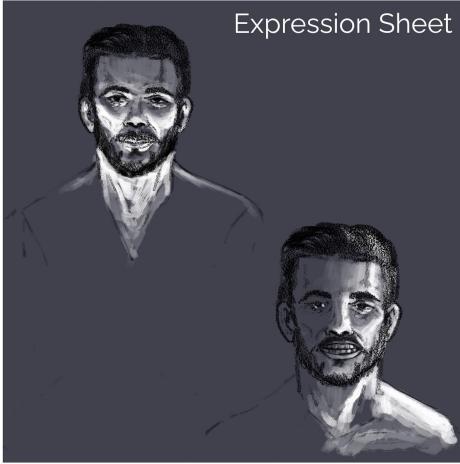

Weight - 76kgs

Sergei Mukherjee (scientist)

Soviet Scientist Sergei was born in Russia, but has an Indian origin.

He always aspired to be a scientist which he achieved early on in his late teens. His IQ is astonishing 220. He is a very cunning and proficient at what he does. He was the one who found the source of excessive radiation (as written in the story) which turned out to be the alien egg. He conducted illegal experiments on Uranium.

Expression Sheet

A Geiger counter is an instrument used for detecting and measuring ionizing radiation. Also known as a Geiger-Muller counter (or Geiger-Müller counter), it is widely used in applications such as radiation dosimetry, radiological protection, experimental physics, and the nuclear industry.

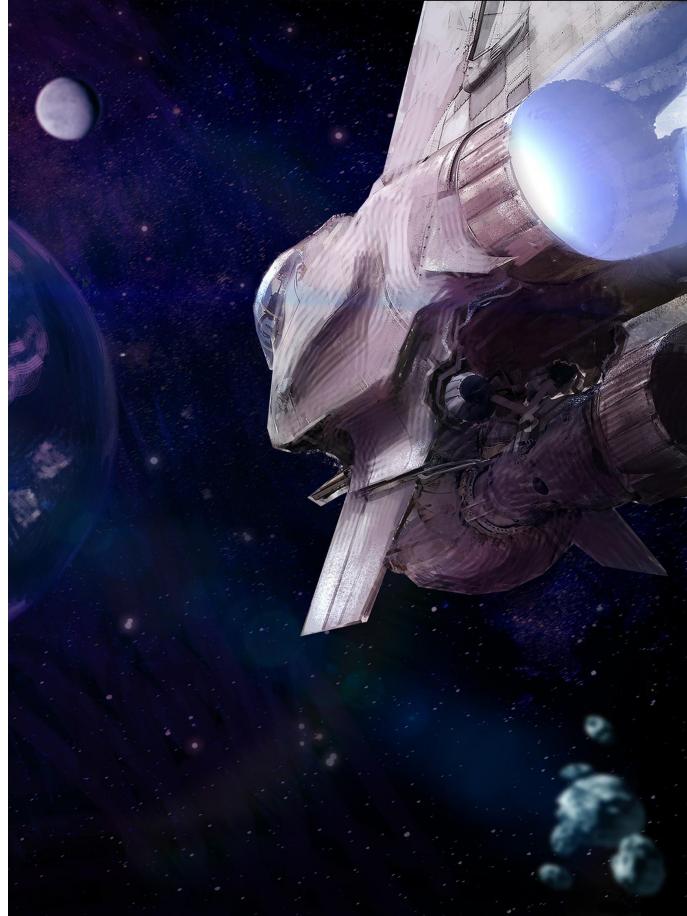

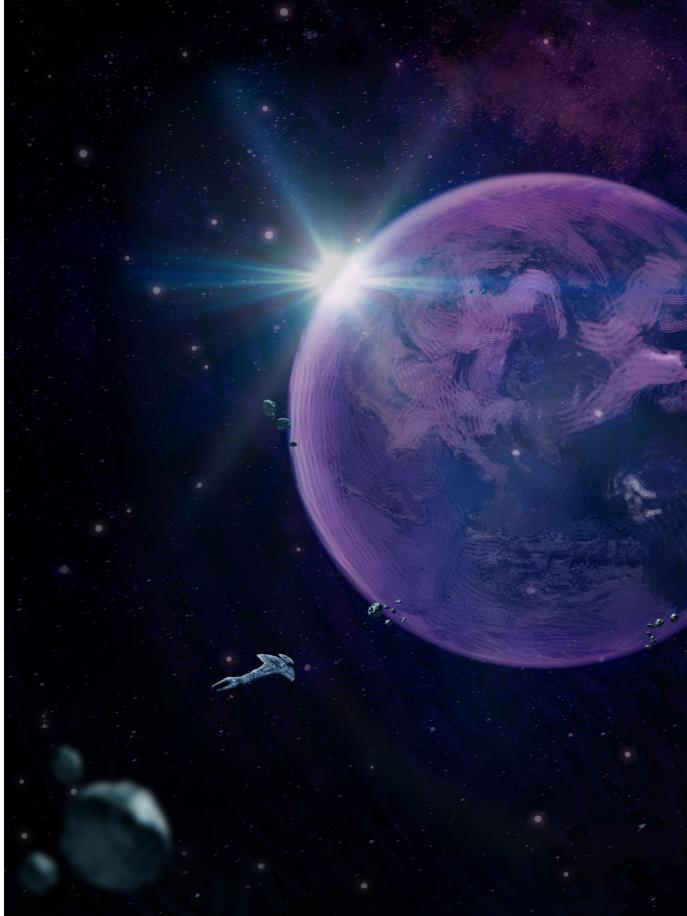

Geiger Meter

CHAPTER 03

ASSETS

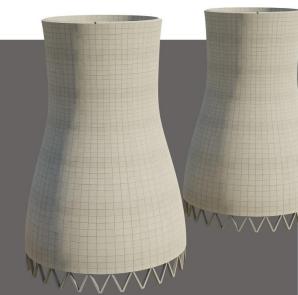

Electric Transformer

A passive electrical device that transfers electrical energy from one electrical circuit to another. Multiple transformers operate to change voltage levels between high transmission voltages and lower distribution voltages.

Power Plant

A power plant is an industrial facility that generates electricity from primary energy. Most power plants use one or more generators that convert mechanical energy into electrical energy in order to supply power to the electrical grid for society's electrical needs.

Cooling Towers

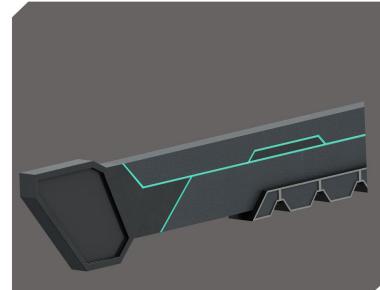

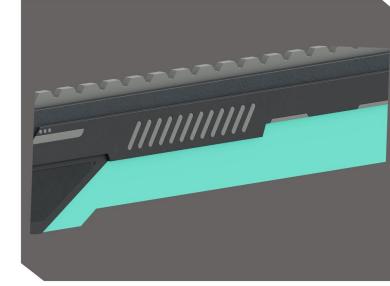

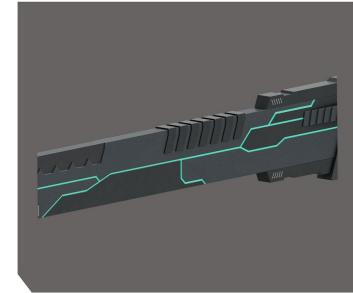

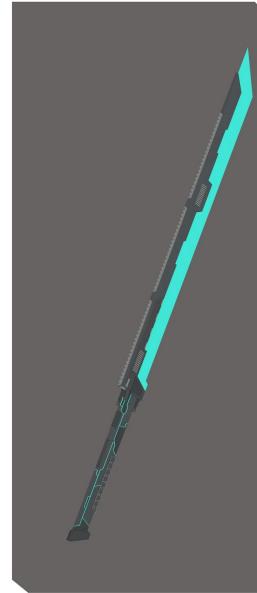

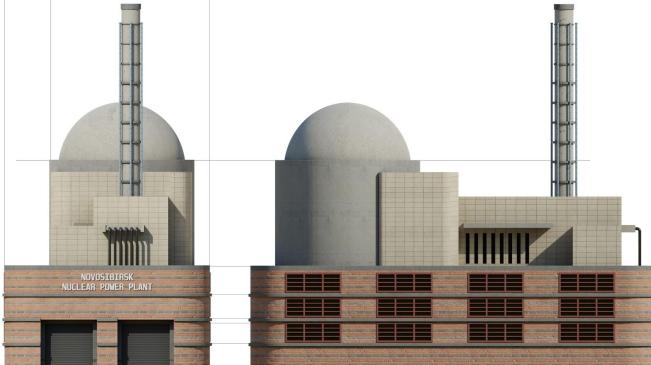

A cooling tower is a heat rejection device that rejects waste heat to the atmosphere through the cooling of a water stream to a lower temperature. Cooling towers may either use the evaporation of water to remove process heat and cool the working fluid to near the wet-bulb air temperature or, in the case of closed circuit dry cooling towers, rely solely on air to cool the working fluid to near the dry-bulb air temperature.

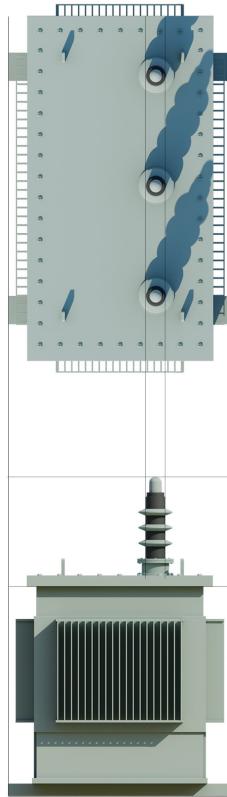

Novosibirsk Power Plant

Located near the city of Novosibirsk, the power plant consists of 2 RBMK - 1000 reactors, each capable of producing 1000 MW of electric power.

Dimension	Value
Height	108 m
Weight	37000 tons
Cost	€2.1 billion

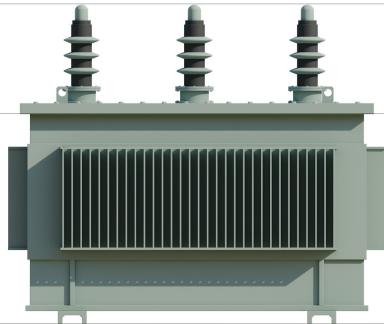

Mithril Close Up Shots

Electric Transformer

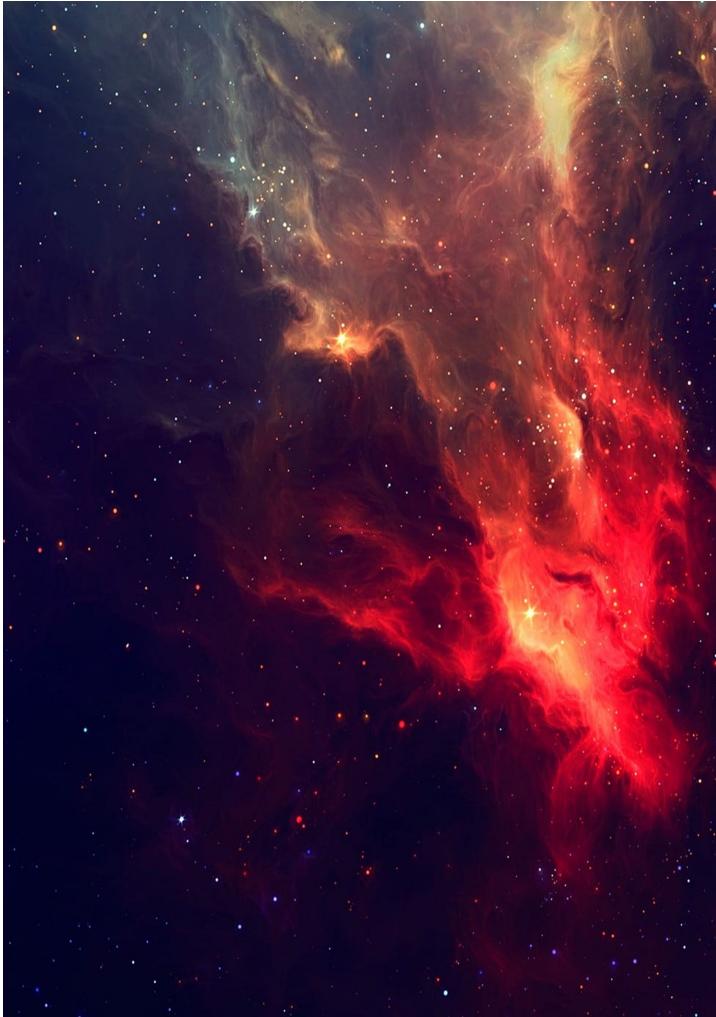

A passive electrical device that transfers electrical energy from one electrical circuit to another. Multiple transformers operate to change voltage levels between high transmission voltages and lower distribution voltages.

Dimension	Value
Height	8 m
Weight	79 t
Cost	€4 million

The Trees

The power plant is sparsely populated by trees of local origin due to excessive amounts of radiation poisoning present in the soil.

NOTE

We started assembling the artworks and assets assuming that in the end it would be compiled in the .pdf format.

Unfortunately we ran into some complication that forced us into choosing the PPT route.

Hope you like the output :)
